

Dear Authors,

Starting with volume 51, the Editorial Board of *Novosti sistematiki nizshikh rastenii* will give priority to review and taxonomic papers as well to papers addressing taxonomic disputes. It is strongly recommended that manuscripts and abstracts be revised by a native English speaker before submission.

Manuscripts that violate Instructions for Authors will be rejected without consideration.

Starting with volume 51, we will publish a new chapter: Short communications on new nomenclatural combinations, replacement names, typification, and validation of invalidly published names. Manuscripts for this chapter must be succinct (250 words maximum per taxon) and prepared in English only, with brief abstracts and keywords in accordance with the following examples: http://www.binran.ru/files/journals/NSNR_Example_Nomenclature_Notes_Eng.pdf and the instruction for preparation of nomenclature citations:
